Udaipur	24.1%	15.9%	18.1%	23.6%	15.5%	15.5%	16.0%	24.7%	22.8%	20.9%	26.1%	17.7%

Estimated platform reduction | percentage points

Seasonal comparison | cancellation rate

Goa in July: 20 cancellations from 38 bookings (52.6%).

The long-lead scenario estimates 154.7 fewer cancellations, or 1.35 percentage points. The worst-city-month scenario gives 0.11 points. Benefits overlap and must not be added.

The 5-point planning target is not supported by these two scenarios. City-season patterns are associations, not proof of a cause.

Weather and booking outcomes

HOTEL BOOKING ANALYTICS

Bookings matched to daily weather

926

Goa | heavy precipitation gap

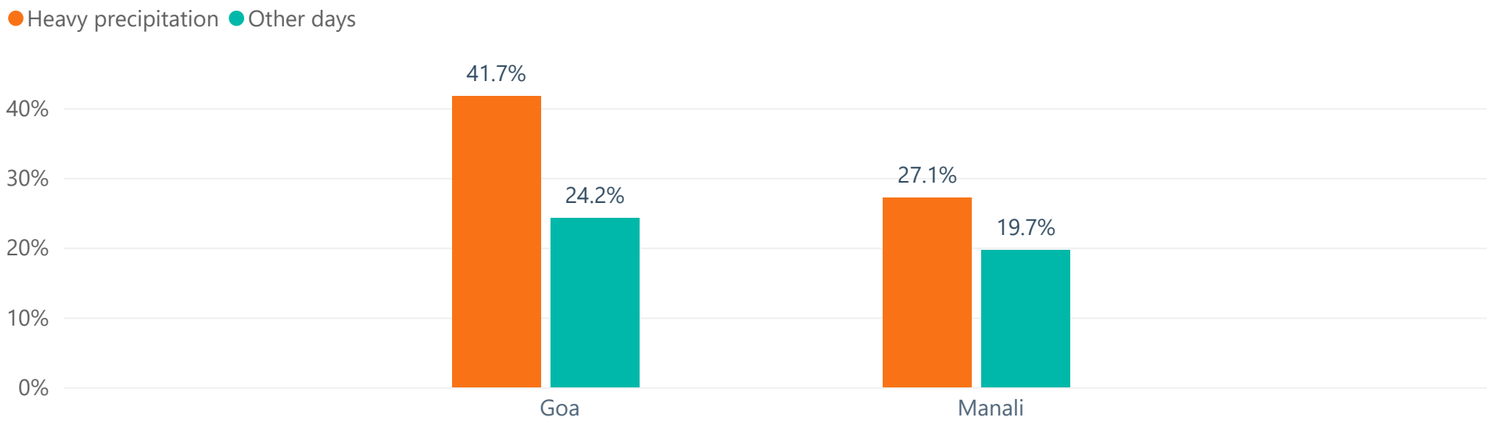

+17.5 pp

Manali | heavy precipitation gap

+7.4 pp

Heavy precipitation: at least 20 mm on the scheduled check-in date. Outcome below combines Cancelled and No-Show.

Cancelled or No-Show | share of bookings

Counts behind the weather comparison

City	Weather	Bookings	Cancelled	No-Show
Goa	Heavy precipitation	84	33	2
Goa	Other days	372	75	15
Manali	Heavy precipitation	59	13	3
Manali	Other days	411	68	13

Association, not proof

Goa: 35 / 84 bookings failed on heavy-precipitation days, versus 90 / 372 on other days.

Manali: 16 / 59 versus 81 / 411.

Weather is matched to scheduled check-in. Cancellation times are unavailable, and bookings sharing a date share one weather observation.
